

CliX

Heads Up!

1. Start with hands pointing to the center: only the **middle stations** type.
 2. Spread arms to side to **bring in the other stations**, while middle ones continue.
 3. Be ready for **register changes**, controlled by arm height.
 4. **Outer stations stop** as hands return to center (as in #1).
 5. Wait for **cutoff**.
 6. Individual, **short clix** — cued individually. No clear pulse. Varied register.
 7. Arms out again to resume pulse.
 8. Watch register changes.
 9. Watch for **cutoff ***, then move **register slider to left**, before resuming on cue.
 10. Watch for final **cutoff**.
- * This cutoff signal is raised index finger, then slow 3 - 4 - 1 pattern.
